Custodian / Bldg. Maintenance Worker

Automotive Mechanic

Treatment Plant Operator

Sewer Maintenance Worker

Streets and Roads Maintenance

Parks and Grounds Maintenance

Utility Worker I / II

Warehouse Technician

Wastewater Collection System Operator I / II

Build-A-TestSM From our Test Competencies List or Reference Library

From our extensive test item bank, we can *Build-A-Test*. Agencies can select from the list of competencies and/or references at the end of this catalog. We can also write new questions to address specific competencies, knowledge or skills based on job analysis information.

We maintain and continually update our competencies test item bank.

Test Validity

Professional and regulatory guidelines for personnel selection examinations include the Uniform Guidelines on Employee Selection Procedures and the Principles for Validation and Use of Personnel Selection Procedures. These guidelines require that personnel selection exams be validated by what is known as criterion or content validation strategies. Criterion validation is a demonstration that scores on the test are correlated directly with job performance or training academy performance. Content validity focuses on the relationship between the content of the test and the content of the job. Further, validity (criterion and content) considers both exam administration and exam outcome factors.

Most of our exam products including Stock Written Tests, *Build-A-Test* and Custom Written Tests, as well as oral exams, performance exams and assessment centers involve measurement of job knowledge or ability. These types of tests are best supported by content validity. For these tests we work closely with you, our client, to ensure that the content of the test is based on the job (job analysis, consultation on test assembly, and exam review by your subject matter experts). We provide test administration guidance including proctoring directions, and we offer scoring services as well as consultation on test score interpretation and passing scores, all at no additional fee. These steps, ensure that the examinations provided to your agency are valid and will be administered in a fair and consistent manner.

It is also important to note that a valid exam plan will go beyond a written test, and will normally include other elements, such as an oral exam, a performance test or an assessment center. This also includes not placing too much emphasis (exam weights) on measurement of abilities and knowledge through a written test; here we typically recommend that a written test be weighted less than half of the overall exam plan. We would be pleased to assist your agency with exam planning or to provide consultation on how to best use our tests.

Entry Level Maintenance Worker T-201 and PT-201

The Entry Level Maintenance Worker is a very basic written test. This is useful for agencies that need to make sure that candidates for maintenance worker positions have basic language skills, can follow directions, and understand safety practices. The test outline is shown below.

Entry Level Maintenance Worker Written Test Form T-201

Items	Description
20	Ability to Read, Understand and Follow Safety Directions
15	Knowledge of Safety Practices and Personal Protective Equipment
10	Basic Math Skills
15	Mechanical Ability

60 items; 1 hour time limit

Entry Level Maintenance Worker Performance Test Form PT-201

Test Station	Performance Test Description
A1	Tree Trimming
A2	Brush Cutting
A3	PVC Pipe Cutting
B	Dig a Post Hole
C	Join Culvert Pipe
D	Operate a Chain Saw
E	Move Dirt
F1	Mix Round-Up
F2	Install a T-Post

PT-201 Exam

In each test station, candidates are examined for 1) Tool Selection, 2) Tool Use, and 3) Safety Considerations.

This is a straight-forward test to administer and score.

70+ candidates can easily be examined in one single day, with six raters (one per test station) plus one person to check-in candidates and monitor the process.

Exam elements (test stations) can be modified to meet an agency's specific needs for the type of maintenance work to be performed.

Maintenance Supervisor T-261

Our Maintenance Supervisor written test is designed for use in any technical or maintenance career field. Basic work organization, supervision and lead work is emphasized. A complete test outline is shown below.

Maintenance Supervisor Form T-261
